Equinox Develops Custom Applications to Meet Unique Needs

You say jump - we say how high?

CUSTOM SOFTWARE IS AT THE ROOTS OF EQUINOX

In 1986 Equinox Information Systems was founded as a custom software development firm serving the telecommunications industry. Although our business has evolved to include a number of commercial applications, our vast experience with a wide array of switch manufacturers and service providers enables us to continue to develop custom software tools quickly and cost-effectively. Whatever your requirements, we have the knowledge and resources to create custom applications to meet your unique needs.

NO-HASSLE CUSTOM DEVELOPMENT

Whether it means creating a whole new application, adding features to an existing application, or simply re-tooling a product to accept data in a new format, Equinox is ready to serve you in a no-hassle environment. Recent custom projects have involved: switch database structures, high-volume transaction processing, binary CDR decoding, and billing system interfaces.

CUSTOMER SPOTLIGHTS

Telecom One purchased Manager to evaluate the traffic on their Telsis Ocean switches. Telsis is a relatively new soft switch that creates multiple records for a single call. Using documentation and sample data provided by Telecom One, Equinox was able to modify Manager to match the multiple Telsis records and to extract the information needed in order to create traffic reports.

TCAST Communications requested that Equinox modify Manager by adding a custom report. Recently, Equinox developed this new report for TCAST called 'Originating LATA within Originating Trunk Group'. This custom report demonstrates the flexibility of Equinox software, as we try to design applications that can evolve to meet the specific needs of our customers.

U.S. South uses AccessCDR and required 3 customizations. Equinox has added an option to their software that allows them to use different file headers for various customers. Another feature was added so that they can generate hourly data files for specific customers. Finally, Equinox has customized the software so that U.S. South can move output files to an alternate location after an output file has been closed.

Cavalier Telephone needed modifications to ShowCDR to work with their unique DMS records. These records were not saved in the standard DMS 250 DIRP format, but rather in DNS format (non-blocked). In short, Equinox evaluated their record format and modified ShowCDR to accommodate the carrier's needs

If you have a unique need, please contact us at 800-544-8874, +1-615-612-1200, or sales@equinoxis.com, or visit our web site at www.equinoxis.com. We will be happy to work with you to prepare a detailed proposal and to provide a cost-not-to-exceed quote.

THAT'S THE LATEST FROM EQUINOX, HERE ARE SOME OTHER THINGS YOU MAY NOT KNOW...

1: Rank of Father's Day among days on which the largest number of collect calls are made in the U.S.

1: Number of Argentina's 17 presidents since 1958 who have completed a full term.

\$17 billion: annual US and European expenditure on pet food.

\$13 billion: annual global expenditure on healthcare and nutrition.

\$40,000: amount American Airlines saved in 1987 by eliminating one olive from each salad served in first-class.
